

# HOSPITALS STRUGGLE TO COPE WITH SURGE IN INFLUENZA CASES

[www.newswav.com](http://www.newswav.com) 27 August 2023

As the influenza pandemic resurges in our nation, it is imperative that we are adequately shielded from its effects. I'd like to introduce **SATIVAplus**, a unique formulation I've developed using Black Seed/Habbatus Sauda (*Nigella sativa*) and monk fruit. The product is rich in Thymoquinone, a potent antiviral compound and a powerful antioxidant.

Numerous patients who contracted the virus in recent weeks have reported a swift recovery within 2 to 3 days after using this product. I recommend considering **SATIVAplus** both as a preventive measure and a treatment for influenza. Its high efficacy against this infection has been observed, with no reported side effects.

A sincere advice from :

**Dr. Mustafa Ali Mohd. FASc**  
Pharmacologist & Toxicologist  
Former Professor Faculty of Medicine,  
University of Malaya 30 August 2023

**30 Chewable Orange Tablets**

formulation consists of **Habbatus Sauda** (*Nigella sativa*), Vitamin D, Zinc, Magnesium and Monk Fruit.

**Nigella sativa or Black Seed** contains **Thymoquinone**

Registered as Health Food Product

A Premium product formulated by ProfMUS
